STEALTH CANOPY

Easy Access & Maximum Security:

Push button opening - open the door with just a push of your finger, elbow, head or whatever else you see fit!

Quick and easy access makes your day on the jobsite just that much better. Also connected to the vehicles central locking system, burglar alarm(if fitted) and auto-relock, you can be assured of maximum security and that your day will never be interrupted by locking your keys inside!

Invest in a forever tool!

The Stealth Canopy is designed to last. You're paying for a quality piece of kit for your work rig, so it has been designed to fit all common models with a simple change of vehicle model fitting kit!

Built like a Service Body:

The Stealth offers unprecedented strength with a full aluminium monocoque shell. This allows for a superior roof rack load rating, and can support a cantilever roof tray which keeps the load away from damaging the cab roof.

All doors are fully-braced, ensuring they will stand up to high wind environments and are easy to open and close. In addition, large water guttering channels water away from the door opening and the door seals are fitted to the doors to keep them out of harms way – ensuring you have a watertight canopy!

A series of horizontal dotted lines for writing, consisting of 20 lines.
